Acajou Mahogany Bedroom Furniture – Louis Philippe styled furniture has always been a classic decorating choice. Based upon the architectural forms of furniture popular in 19th century France, the style is noteworthy for the wide ogee moldings used under its tops and as bases. The Acajou collection by Broughton Hall, Ltd. is crafted of solid mahogany and contains no veneers! The furniture features dovetail construction, hidden felt-lined drawers and beautifully inset drawers trimmed with nickel hardware. A shadow box molding frames the casings, bases have square turned bun feet, and end panels are scalloped for a beautiful ripple effect. Capping it all off, the rich distressed finish approximates the patina of fine old antiques. This heirloom quality bedroom set includes a generously proportioned queen sleigh bed, a ladies dresser with mirror, a gentlemen's tall 5-drawer dresser, an armoire, and two bedside chests.

This incredible package gets better! Your brand new furniture will be transported courtesy of Party Rental World and the TBEF parents! Donated by the MacDougall Family.
